

G T A A G A G T

The image displays a DNA sequence logo for the sequence GTAAAGAT. The logo is composed of eight vertical columns, each representing a position in the sequence. The top row of letters (G, T, A, A, G, A, G, T) represents the most frequent nucleotide at each position. The bottom row shows the relative frequency of the other three nucleotides. The colors are: G (orange), T (red), A (green), and C (blue). The sequence is GTAAAGAT.
